

Ibrahima Thioune

Engineering student in Electronics, Electrical Energy and Automatic Control · ENSEEIHT

Phone: 06 05 71 52 46
Email: thiouneibrahima32@gmail.com · Toulouse, France

PROFILE

Looking for: a two-year work-study contract (alternance) starting September 2027 and/or an internship starting June 2027.

First-year engineering student at ENSEEIHT, in Electronics, Electrical Energy and Automatic Control (EEA), I am looking for a work-study position to put my technical skills into practice and develop them. I am particularly interested in electrical energy, electrical engineering, system modeling and simulation, and automatic control.

EDUCATION

First year of the engineering program · Electronics, Electrical Energy and Automatic Control (EEA)
ENSEEIHT · Toulouse, France | 2026 - 2027

Bachelor's degree, 3rd year · Electronics, Electrical Energy and Automatic Control
University of Toulouse · Paul Sabatier | 2025 - 2026

BTS in Electrical Engineering (Electrotechnics), Higher Technician Diploma
CEDT Le G15 · Senegal | 2023 - 2025

Bachelor's degree, 1st and 2nd year · Mathematics, Physics, Computer Science
Cheikh Anta Diop University, Dakar · Senegal | 2021 - 2023

Scientific Baccalaureate
Lycée ICS de Mboro · Senegal | 2020 - 2021

PROFESSIONAL EXPERIENCE

Multi-purpose Employee · ALDI
Toulouse, France | February 2026 - Present
- Customer checkout and cash handling, and stocking shelves
- Store maintenance and cleaning, compliance with hygiene and safety rules

Electrotechnical Maintenance Intern · METAL AFRIQUE
September 2024 - October 2024
- Took part in electrical installations
- Wiring of electrical cabinets and troubleshooting of electrical equipment
- Fault diagnosis, preventive and corrective maintenance
- Reading electrical diagrams, testing and commissioning equipment

PROJECTS

L3 EEA Project · Connected Beehive (IoT · LoRaWAN)
University of Toulouse | January 2026 - June 2026
Project to remotely monitor and control a connected beehive: sensor data transmitted via LoRaWAN and TTN, processed with Node-RED, displayed through a web interface (Ngrok) and solar-powered.

BTS Project · Photovoltaic system for a medical refrigerator in an isolated site
CEDT Le G15 | August 2025
Study and construction of a photovoltaic system to power a refrigerator for storing medicines in an isolated site, including a study of solar production and system sizing.

Computer Science Project · Snake game (C language)
Design and development of a Snake game in C.

SKILLS

- Industrial automation: design and programming in Ladder (LD) and FBD, study and analysis of specifications
- Modeling and simulation: development of models in MATLAB/Simulink
- Control systems: time and frequency analysis (transfer functions, Bode, stability)
- Electronics: simulation of circuits and embedded systems with Proteus, LTspice
- Programming of PIC microcontrollers with MPLAB (C / Assembly)
- Maintenance and troubleshooting of electrotechnical equipment
- Use of measuring instruments (multimeter, clamp meter, ammeter)

LANGUAGES
- Wolof (native)
- French (fluent)
- English (B1)

SOFTWARE
- Proteus
- Zelio Soft
- LTspice
- MATLAB

OFFICE TOOLS
- Word
- Excel
- Canva
- PowerPoint

INTERESTS
- Sport
- Travel
- Reading
- Televised debates
